

## New for Winter 2007 a "His & Hers' dual warmth quilt

After requests from several leading Manchester retailers, we designed a "His & Hers" alpaca quilt, ideal for those couples where one sleeper is a "hot" sleeper and the other a "cold" sleeper. The new His & Hers quilt ranges are available in both queen and king sizes and in the Alpaca Gold and Alpaca Classic styles to suit everybody.

Instead of the traditional hot & cold problem being to either use two separate quilts or having to attach a supplementary quilt onto the colder sleepers side, Kelly & Windsor has created the perfect dual temperature sleeping comfort solution , a dual weight quilt with different filling weights on each side.

## Super Warmth with Thermal Pocket quilts

For very cold climates, we have designed a unique Thermal Pocket quilt which is an air pocket, to trap warm air between two layers of alpaca fleece.

The new Super Warm Alpaca Gold quilts are luxuriously soft with outstanding warmth to weight performance. The thermal efficiency of alpaca fleece has now been optimized in a unique design which is available in different weights and sizes upon request.
